S. MENDELSON MEEHAN, Vice-Pres't
THOMAS B. MEEHAN, Sec. & Treas.

Season 1904-5

PRICE LIST
OF
SEEDS
OF
Trees, Shrubs and
Fruits, Etc.

FOR SALE BY

THOMAS MEEHAN & SONS, Inc.

Nurserymen, Tree Seedsmen and Landscape Engineers.

Germantown, Phila., Pa.

AS WE COLLECT but few more seeds than are ordered, this list is, of course, issued in advance of the season, and there may possibly be some which may fail to mature. To secure a full supply, early orders are solicited.

In some seeds, especially *Quercus* and *Carya*, an egg is deposited by a fly, which cannot be detected until the worm makes the hole in the seed on its exit, and there are often some unsound ones which it is impossible to detect when collecting them. We do our best to collect in places believed to be free from the insect, and to give only sound and perfect seeds. Injuries which may come from these hidden causes are, of course, at the risk of the purchaser. There are some trees, such as the *Liriodendron* and *Acer Saccharinum*, for instance, which never perfect all their seeds; some are always bad, and there is no way to separate the imperfect ones.

Not less than one-quarter pound is furnished at pound rates, nor one-quarter bushel at the bushel rates. Satisfactory arrangements for payment must accompany orders from unknown correspondents.

When seeds are to go by mail, the charge is eight cents per pound additional. P. O. orders payable at Philadelphia.

GERMINATION OF THE SEED

Most failures with seeds arise from not sowing them in **Partial Shade**. If hot bursts of sun come on the seed beds while the seeds are swelling and cold follows, many of them are liable to rot before they appear above the surface. For raising seeds on an extensive scale, many now use artificial arbors, tall enough to work under. For small lots, brushwood, or a thin shade of cornstalks, or a skeleton frame, is an excellent plan. Where birds are destructive, lattice frames are made to cover the beds with. There are many kinds of seeds which, in the hands of experienced cultivators, need no shade, but to all persons of limited knowledge we would recommend to shade every one.

Seeds take some time to swell their coats after going in the ground, hence all should be put in as early as possible in fall or spring. Many find advantage in sowing even on frozen soil in Spring. In some climates where the springs are early, some seeds will remain in the ground till the following season. If they fail to appear by the time the spring is over, examine, and if found with fresh kernels, keep the beds weeded and shaded till the next season.

These simple directions are all that anyone needs to have tolerable success in raising tree seeds. The greater the experience, of course, the greater the success.

Guarantee.—While we exercise great care to procure the very best seeds, they are sold without any warranty, expressed or implied, and without any responsibility in respect to the growth of the seeds, or of any percentage of growth, there being too many causes, known and unknown, which prevent good seeds from germinating. Orders are accepted and shipped on these terms. Samples will always be furnished when applied for. Should any cause for complaint appear on receipt of a shipment, customers will kindly notify us within five days of the same, otherwise it is understood the seeds are accepted.

Conditions.—All offers and acceptances of orders are subject to our receiving the full quantity for which we have placed orders with our growers and collectors. Failing to get these amounts, we reserve the right to reduce proportionately all orders that have been booked.

ALL ORDERS SHOULD BE PLACED EARLY

All our seeds are fresh. All are carefully examined before sending. Nothing is sold but what seems, to the best of our knowledge, to be first-class. Anxious to have our customers come to us regularly every year, it is not to our interest to send anything but first-class seeds. What are unsold at the close of the season, we sow ourselves, to keep up our supply of seedlings, hence customers can rely on the fresh quality of what we offer.

Enquiries for large lots solicited.

Hardy Herbaceous Perennial Seeds

Having one of the finest collections of Herbaceous Plants in the country, we often receive inquiries whether we can supply seeds of the same.

Hitherto we have only collected and saved sufficient for our own use, but, having a surplus of some kinds, we herewith give a list of those we can supply in limited quantity.

Large trade packets, 10c. each, 12 for \$1.00, in any assortment.
